

This electric lock uses a precise control mechanism and cooperates perfectly with the door and motor to provide a convenient and safe door locking solution.

TECHNICAL DRAWINGS

FEATURES

- Works automatically. Always locks and unlocks with each door operation.
- Smart lock designed for industrial sectional doors controlled by shaft motor base35; base50 and base70.
- Wired Connection: Stable and reliable wired connection prevents wireless signal interference, avoiding battery usage, and ensures long-term stable operation.
- Safe and reliable: The electric door lock is connected to the motor to ensure that the door is effectively locked when closed to prevent illegal intrusion.
- Robust and durable: Made from high-strength materials, resistant to impacts and corrosion, suitable for different climatic conditions.
- In the event of a power outage, it can be unlocked manually.

TECHNICAL FEATURES

INPUT VOLTAGE	10-38V DC
TRIGGER POWER CONSUMPTION	400mW
UNLOCKING TIME	0,5s
PROTECTION GRADE	IP43
WORKING TEMPERATURE	-20°C ~ +60°C

PACKAGING

Package size: 207*160*45
Package weight: 0,431Kg
