You are in control

USB bluetooth and Wi-Fi device that allows you to remotely control up to 12 devices, with your smartphone, by copying the RF channel of all types of remote controls.

TECHNICAL DRAWINGS

FEATURES

- With the wi-remote device you can copy the RF codes from your remote controls, thus allowing you to control your automations from a single mobile application.
- After registering the Wi-Remote device to the Smart Life app, you can establish a connection between Smart Life and Google Home or Amazon Alexa.
- Device share to your family members or coworkers. Multiple people can download the app, allowing you to share the control. With NO LIMIT of users, you can add or remove permissions to use any time.
